

QOMATIC GENUINE TICKETS

Qmatic Kiosks are built to endure heavy usage. However, using non-genuine tickets can compromise your kiosk's reliability and may lead to technical issues not covered by warranties or service agreements.

To ensure consistent, reliable printing and high-quality results, it is essential to use Genuine Qmatic Tickets—specifically designed by Qmatic for Qmatic.

Genuine Qmatic Tickets are designed as a part of an entire system. Every detail, from the specification of the paper quality to the unique (patented) cutting pattern, contributes to uninterrupted and trouble-free operation.

All Genuine Qmatic Tickets are 100% recyclable, produced under FSC regulation, and BPA-free. In addition to BPA-free tickets, we also offer BPS-free alternatives.

By purchasing and using Genuine Qmatic Tickets, you can be confident that your kiosk and ticket printing will perform optimally.

To ensure you are buying Genuine Qmatic Tickets, always purchase directly from Qmatic.com or Qmatic partners.

Why Genuine Qmatic Tickets?

Kiosk reliability

The reliability of kiosks can be compromised by the use of non-genuine tickets, leading to paper jams, malfunctions, or breakdowns.

BPA/BPS free and 100% recyclable

Non-genuine tickets can pose risks to your customers and employees. Genuine Qmatic Tickets offers a safer alternative with BPA and BPS-free alternatives, and they're 100% recyclable.

Support & warranty

Any damage or malfunction to Qmatic Kiosks caused by the use of non-genuine tickets is not covered under warranties or service agreements.

Reduce waste

The precision OCR markers are perfectly positioned to give you the maximum number of printed tickets on each roll. With non-genuine tickets there can be up to one faulty printing out of five.

Characteristics of Genuine Qmatic Tickets

- Qmatic logo on ticket rolls and boxes
- Qmatic seal sticker on ticket rolls
- Produced without the use of Bisphenol A (BPA-Free)
- Produced under FSC regulation
